Students for Zero Waste Week is a school-driven, week-long campaign to reduce waste on school campuses and within local communities with the intention of moving towards zero waste.

*Students for Zero Waste Week invites your school to take the **Zero Waste Week Challenge** at school, in your community and at home by:*

- Replacing single-use plastic items (such as drink bottles, sandwich baggies, spork packs, etc.) with reusable alternatives
- Replacing plastic straws with paper straws or consider not using straws
- Stepping up recycling and composting efforts
- Replacing single use condiment packets with bulk dispensers
- Powering down computers and other electronic devices when not in use
- Refusing products containing microbeads
- And more!

The extent to which your school is involved is up to your school!

Use the hashtag **#zerowasteweek** on your social media posts!

Go Green. Think Blue.
