Dear Kirk Schmidt, Chair  
Sanctuaries should be safe  
havens for the wildlife within.  
However, these sanctuaries  
currently do not have any  
regulations to protect marine  
life from deafening sound of  
seismic airguns used in the  
oil and gas industry for  
exploration of the ocean floor.  
Please, please protect our  
marine life by having an

immediate resolution calling  
for the Superintendent to  
impose a ban on seismic  
airguns within sanctuary  
waters - We must protect our  
marine life! I would be so  
very grateful and would  
appreciate a quick reply.

Sincerely

John
